ABOUT

Locked in

Locked In is NxtStepEdu's project-based internship program for engineering students who are done simulating and ready to build. No more tutorials — students get hands-on time inside practice codebases modeled on real production systems, across Data Science & AI/ML, Full-Stack Development, Cybersecurity & Ethical Hacking, Cloud/DevOps/SRE, and AR/VR & 3D. With mentor-guided code reviews and deadline-driven tasks, Locked In gives students one thing tutorials can't: proof they can actually ship.

Locked in

MONTH 1

MENTORS WITH +5 YEARS OF EXPERIENCE

live interactive sessions followed by one on one doubt clearing sessions

ACCESS TO STUDY MATERIAL FOR THE LIFETIME

All recording sessions and study material will be available in LMS for lifetime

CURRICULUM BASED ON INDUSTRY REQUIREMENTS

All concepts and platforms covered during the training are

based on inputs from our affiliated industry experts.

Locked in

MONTH 2

TWO LIVE INDUSTRY PROJECTS

One major project

One minor project

MENTOR GUIDANCE DURING PROJECT

All mentors will be listed as project leads and will be responsible for guiding interns till project completion.

ADDITIONAL PROJECT

Additional project for personal development may be requested

Tracks offered

Data Science & AIML
Full stack Development
Cyber Security and Ethical Hacking
Cloud Computing
AR/Vr and Game Development

Work with real datasets and models train it, tune it, and ship it inside a working pipeline.

Build frontend to backend inside a real application architecture no, training wheels, no toy projects.

Learn to think like an attacker and build defenses that actually hold up under pressure.

Get hands-on with pipelines, deployments, and infrastructure the systems side of shipping software.

Design immersive experiences and 3D assets for the next generation of interfaces.

Why this matters?

Git based Collaboration

Complete Portfolio Building

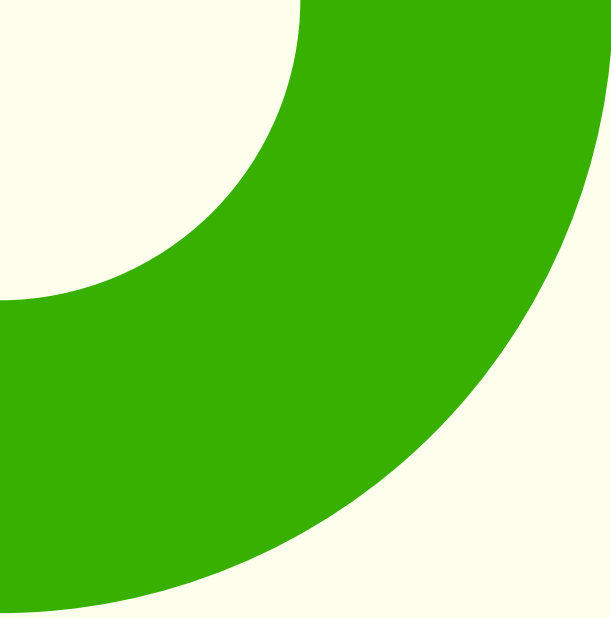

Mentor Feedback and Analysis

Pricing options

Plan	Price	Best for
Standard	₹4,999	University Students & Students seeking new opportunities to upskill and enhance their career
Ultra	₹12,999	Freshers seeking job employments and placements

NxtStepEdu is an ed-tech platform built for engineering students who want real, hands-on experience before they graduate. Most students learn a lot of theory in college but get very few chances to actually build something real. We saw this gap and designed our flagship program, Locked In, to fix it. Locked In gives students project based internships in the skills that are actually in demand in the market today. Students work inside practice codebases modeled on real production systems, get their code reviewed by mentors, and finish with a portfolio they can show, not just a certificate. Our goal is simple. We want to close the gap between what students learn in class and what they are expected to do on their first day of work.

Thank you for making the right choice
